The fund attempts to outperform the S&P 500 index.

Suitable For

The fund is suitable for investors seeking common stock investment for total investment return (consisting of price appreciation plus income) or as a core equity portfolio for those using several asset classes.

Risks

Stock prices fluctuate in response to general market and economic conditions and to the activities of individual companies. Price fluctuations can be dramatic in the short term but over the long term the average market value has historically increased.

A control-weighted portfolio of companies selected from the Approved Wright Investment List on the basis of quantitative formulae which take into consideration factors such as over/under valuation and compatibility with current market trends. Holdings are broadly diversified, and limited to 5% of the fund's assets in securities of any one issuer, and 25% in any one industry group. See other side for a listing of current holdings.

Wright Investors' Service is a leading independent international investment management and advisory firm with more than 30 years experience. Wright manages assets for bank trust departments, institutions, professional fiduciaries, and individuals, as well as mutual funds.

Below are the fund's annual total returns (%) for each of the last 10 years:

Total Return is the % return of an initial investment made at the beginning of the period to the ending redeemable value assuming all dividends and distributions are reinvested. Remember, past performance is not predictive of future results.
